- 1 x Gift box

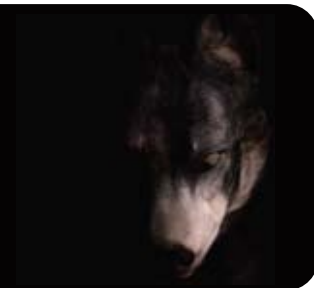

Wolf-Eyes - Tested on Humans

You're NEVER in the dark with Wolf-Eyes

WOLF-EYES

Tactical Flashlights

Boxer

Boxer 24W I68R

High Intensity Discharge lights. You have seen their powerful beams on expensive European cars, now you can wield that sort of power in your hand! The Wolf Eyes Boxer series is the smallest production HID torch in the world.

Packing a huge 1800 lumens into its 193mm length, the Boxer projects a far reaching, narrow beam. The torch takes 22 seconds to reach full power, providing roughly 100 lumens at initial turn on, ramping up to 1800 lumens twenty two seconds later.

As the Boxer projects a beam hundreds of metres, it has found favour for search and rescue use, spotlighting and recently with hunters in Australia, its low 509 gram weight adding little to the mass of the rifle. The battery magazine makes for fast changes in the field.

If you are after the maximum throw from a very compact package the Wolf Eyes Boxer is the light for you. You can extend the functionality of your Boxer with holsters, spare battery magazines, Infra Red, yellow and red filters.
