Wolf-Eyes - Tested on Humans

You're NEVER in the dark with Wolf-Eyes

WOLF-EYES

Tactical Flashlights

Crocodile

Crocodile I K-3400/12

The Crocodile, the big gun of the Wolf Eyes range.

The ability to utilise 3,400 lumens from 2kg and 400mm will revolutionise your concept of handheld illumination. Light enough to be held in one hand, the Crocodile is supplied with a shoulder strap so it can be used hands free as well. Both AC and DC chargers are supplied, with long leads so they can be used to recharge the battery pack or to power the unit whilst in operation. All of this in an alloy case so it is ready at all times for rapid deployment.

The square handle provides a solid surface to mount this unit and we have had clients describe mounting it on a variety of items from Light Armoured Vehicles to wheelchairs!

3,400 lumens handheld! There really is nothing more to say. If your team or operation demand this sort of power, you will know who you are.
