## Storm 780

Storm

The Storm, a multiple quality LED with large output and long runtime in a very compact package.

The Storm has 4 modes, high, medium, low and strobe. The combination of high capacity batteries and efficient LEDs provide long runtimes. Three LRB 168A are mounted in magazine BM 168 for quick in field changes.

Some forces are using this torch as a replacement for the common black baton like light due to the superior light output, as such there is a holster available which fits all service belts in Australia as well as this torch fitting into many common torch rings.
